

RADIUS IS A SERVICE ORIENTATED LIFTING SOLUTIONS PROVIDER.

We offer a premium quality product, from tender stage to project completion, delivered by qualified, competent, experienced and conscientious personnel with a can-do attitude and an eye for detail.

Our lifting service is not about what we do; it is all about what you need. Flexibility and adaptability are our watchwords.

We respond as and when you need our help, either with a complete package to manage the whole lifting operation for you or with discrete lifting elements delivered as bespoke moments within your project plan.

Our service aspiration is to become your integrated long term lifting partner whom you trust as you trust your own, rather than remain your occasional lifting contractor.

We invest in the latest technology to leave nothing unplanned and eradicate unexpected difficulties so that once the lifting operation starts we know we will complete it successfully.

We use this technology to create a detailed 3D virtual environment based on real-world data that enables us to plan your lift in greater detail and far more accurately than our competitors.

It allows us to test different configurations, loads and methodologies.

TECHNOLOGY

EXCELLENCE COMES AS STANDARD

■ TECHNOLOGY

TECHNOLOGY

WE USE THE LATEST TECHNOLOGY TO LEAVE NOTHING UNPLANNED.

WE CREATE A DETAILED 3D VIRTUAL ENVIRONMENT BASED ON REAL-WORLD DATA, THAT ENABLES US TO PLAN YOUR PROJECT IN GREATER DETAIL AND FAR MORE ACCURATELY THAN OUR COMPETITORS. IT ALLOWS US TO TEST DIFFERENT CONFIGURATIONS, LOADS AND METHODOLOGIES TO ENSURE THAT THE PROJECT WILL COMPLETE SUCCESSFULLY.

“WE LOOK AT EVERY DETAIL... FROM EVERY ANGLE”

AUTOCAD / 3D CRANE MANAGEMENT

We are determined that nothing will hinder the efficiency of our work with you. We rigorously maintain our AutoCAD environment at the latest release level, to ensure compatibility with whatever versions you are using. Whenever we receive a drawing from you we will be ready to work with it immediately, to overlay it with others and start building an accurate virtual-world 3D model of your entire site.

VEHICLE SWEEP PATH

Our vehicle swept path analysis software integrates with the AutoCAD / crane management software to animate an accurate 3D model of any vehicle passing through the 3D lift landscape.

TRAFFIC MANAGEMENT PLANS

Our in-house traffic management software integrates with the full 3D planning suite of AutoCAD, 3D crane management and vehicle swept path technologies to provide a complete platform for our start to finish planning of each lifting operation.
